## Netia System Used in South Kivo

2.02.2007

Netia said its Radio-Assist range of digital audio software programs is being used to launch a radio project within the South Kivu region of the Democratic Republic of Congo.

Radio Concordia was established to provide religious programming for the South Kivu region while raising the profile of the area's poor, it stated. The Rev. Jean-Paul Bahati is a Catholic priest in the DRC's Bukavu Archdiocese and to the Radio Concordia project. He said the system will be used to create and broadcast educational programs.
